

A modular approach to common challenges

Why iNterface?

iNterface is a **modular, multi-functional operational support tool** which provides an Eco-system that can be applied to several business environments. This suite of software is offered on a **secure Web based** platform, accessible from any internet connected smart device. The platform consists of a number **functionally distinct areas** that can operate independently, however demonstrate increased efficiencies and effectiveness when modules are combined. Although each module has its unique area of functionality, they leverage **common data**. The architecture of iNterface ensures **ease of deployment** in varying environments, with minimal customisation for a chosen application.

“Digitally centralised – Operationally decentralised”

Commercial iNterface (Ci)

Commercial iNterface provides an **online platform** that manages the **full life cycle of e-Commerce** being customer order placement online through to the issue of **automated back-to-back purchase orders** to your suppliers.

This module is aimed at the **Business-To-Business (B2B) market**, can be tailored to your business size and needs and provides for your customers and suppliers to **self-register** onto your unique website (URL) in a simple and easy few steps.

You can upload an **unlimited number of products** with their digital images, **map your product catalogue** to that of your suppliers and their prices and **set your customer pricing** as per your contract per customer.

Through the **self-register functionality for your customers**, you can determine minimum information to be captured supported by documentary proof, like company registration, VAT registration, etc., which can be uploaded to the platform. Your customers can load orders on your platform, or you can decide to capture manually.

For suppliers, we introduce the principle of **Know Your Supplier (KYS)** whereby as part of the self-registration process, your suppliers populate minimum information, upload 5 types of documentary proof and supported by a robot principle allow you to Review and Verify the documents. Please see our KYS Data Sheet, as published, for more information.

Due to the ability to map your product catalogue with your suppliers' catalogues and prices, a customer order can initiate an **automated back-to-back purchase order** to your supplier based on your rules set in the platform.

Benefits

- **B2B e-Commerce Platform**
- **Unlimited Products**
- **Unlimited Users**
- **Customer and Supplier Pricing and Self-Service**
- **KYS and Customer Governance**
- **Automated Back-to-Back Purchase Orders**
- **Easy Registration**
- **Usage-based monthly subscription fee**
- **Secure platform**
- **WEB based, always on, accessible anywhere, anytime**

A modular approach to common challenges

Commercial iNterface (Ci) continued

The integrated **Geo-Location capability**, together with a comprehensive rule-based engine makes cost of delivery calculations simple and effective. Automated in-system order **notifications** improve service delivery and customer satisfaction.

With the demand to be more **digitally connected** to all your stakeholder, we understand that you potentially invested heavily in your ERP system and cannot afford to take the risk to allow them access into your ERP system.

For that reason, the platform is positioned as a **complimentary platform** to your ERP system ensuring structured engagement and collaboration between your business, your customers and your suppliers. Due to iNterface's **open architecture, integration** to financial systems is seamless and we will work with you to maximise the benefit of the commercial operational capability of the platform in support of your ERP system.

Commercial iNterface, hosted in a **world class data center**, gives you the assurance of a **secure, stable platform, available 24/7** with international up-time standards.

The platform is available as a managed service or self-service.

Commercial iNterface gives you a digital footprint in the world of e-Commerce, automation and efficiencies that will encourage your customer and supplier to transact and collaborate with your business.
