

A modular approach to common challenges

Why iNterface?

iNterface is a **modular, multi-functional operational support tool** which provides an Eco-system that can be applied to several business environments. This suite of software is offered on a **secure Web based** platform, accessible from any internet connected smart device. The platform consists of a number **functionally distinct areas** that can operate independently, however demonstrate increased efficiencies and effectiveness when modules are combined. Although each module has its unique area of functionality, they leverage **common data**. The architecture of iNterface ensures **ease of deployment** in varying environments, with minimal customisation for a chosen application.

“Digitally centralised – Operationally decentralised”

Market iNterface (Mi)

Shopping with our Market iNterface is quick and easy.
